mored ships for the United States and Germany, compared with twenty-two for Great Britain, or only eighteen if we assume that the cabinet will fail to authorize four conditional Dreadnaughts."

SANTA FE MOTOR CAR EXPECTED TO ARRIVE TOMORROW

WILL PASS THROUGH LAS VEGAS
WITH OWN POWER ON
WAY TO COAST.

Car Holds Seventy-Five Persons and
Is Capable of Exceeding Sixty Miles
an Hour.

The first of the new motor cars to be used on the Santa Fe left Topeka Tuesday night on the Santa Fe for Los Angeles, and is expected to pass through here tomorrow. This car was brought to Topeka from St. Joseph late Saturday night in charge of P. C. Fox, general superintendent, and J. M. Connell, general passenger agent, and was on exhibition in the yards an entire day.

The Santa Fe recently let a contract for a number of these cars, which will be used on the branch lines and other cars are expected to arrive in the city within a short time.

The next car which will arrive some time this week, will be placed in service on the branch line between Chanute and Pittsburg. Other cars will be assigned to the other branches as fast as they arrive.

The new motor cars are 200 horsepower each. They are built of steel and with a front resembling the prow of a ship. Because of this feature, they are already known as "wind-splitters." The car weighs 60,000 pounds and is 55 feet in length. It has a comfortable seating capacity for 75 persons, although the car could in an emergency be crowded to make room for an even 100.

In the forward part the car carries a six-cylinder gasoline engine of 2,000 horsepower, and is capable of exceeding 60 miles an hour.

The entrance to the car is by a single door on each side, similar to those of an English coach. On the trip to Topeka, General Superintendent Fox several times ran the speed up to 55 miles an hour. By the time the car reaches Los Angeles the mechanism will be running much smoother and the car can easily make 60 miles an hour.
